DESCRIPTORS	Academic Failure; College Credits; *Community Colleges; *Credit Courses; Degrees (Academic); *Grade Point Average; *Grades (Scholastic); Liberal Arts; *Majors (Students); *State Surveys; Two Year Colleges; Vocational Education
IDENTIFIERS	*Hawaii

ABSTRACT

The grades earned by all students registered for credit classes in the seven Hawaii community colleges were analyzed to determine student grade point averages by college program and the distribution of grades in courses offered by the colleges. This analysis revealed that: (1) the credits-earned rate was 71%; (2) these rates were higher for vocational courses (74%) than for general education courses (69%); and (3) they ranged from 67% in natural sciences courses to 83% in health science courses. Of the grades assigned, 24% were A's, 23% were B's, 10% were W's, 11% were N's, and although two colleges did not assign F grades, 5% were F's. The grade point average (GPA) for the community college system was 2.76, which was higher than the Fall 1978 GPA of 2.74, but lower than the Fall 1975 GPA of 2.87. For the first time, vocational education majors earned a higher GPA (2.75) than liberal arts majors (2.73), though unclassified students continued to earn the highest GPA (2.96). The report includes tables illustrating grade point averages and grade distributions by college and by program area. (JP)

Distribution of Grades and Current GPRs Earned
Community Colleges
Fall 1979

Introduction

This is a brief report summarizing data on student achievement as perceived from two dimensions: (1) by the current grade point averages earned by students (by program); and (2) by the distribution of grades in the courses offered by the colleges. Such information is helpful in examining campus grading practices and in planning and assessing academic programs.

Source

Computer reports 2528 and 2529 were used as the source documents for this report. (These reports are on file in the registrar's office at each campus.) They are generated at the end of each semester after all of the grades have been submitted. (The printouts contain data by specific programs and subject areas, i.e., accountant majors, apparel design majors, etc.; and by English, history, etc.; by courses.)

Population included

The data include the grades given to and earned by all students registered for credit classes, i.e., regular students, special students (early admits and concurrent registrants), students in credit courses offered by continuing education as well as students who registered for the first time in the second-eight week session.

Highlights

Tables 1 and 2: Distribution of Grades and Average Grades Assigned

Community college totals and individual campus data show minor or no difference from the information reported for last fall:

a. Credit-earned rate

(1) The credits earned rate was 71 percent;
(2) Credits-earned rates were higher for vocational courses (74 percent) than for general education courses (69 percent);
(3) Credits earned rates ranged from 67 percent (natural science courses) to 83 percent (health services courses), by subject area.
(4) Credits-earned rates ranged from 63 to 79 percent, by campus.

b. The distribution of grades

(1) Almost half (47 percent) of the grades were A's and B's (24 and 23 percent, respectively.)
(2) "W" and "N" grades comprised 10 and 11 percent, respectively, of the grades this fall as was true in Fall 1978.
(3) Five of the seven campuses gave "F" grades. Five percent of the grades given this fall were "F" grades. The proportion of "F" grades assigned ranged from 1-12 percent.
(4) Average grade assigned ranged from 2.6-3.1, by campus.
(5) The average grade given was 2.8.

Table 3: Current GPRs by Major and Educational Objective

a. The current mean GPR of 2.76 earned by community college students is slightly higher than the 2.74 reported for Fall 1978, but considerably lower than the 2.87 reported for Fall 1975.

b. For the first time, the current GPRs earned by vocational education majors were higher than those earned by the liberal arts majors (2.75 compared to 2.73). The average GPRs of the vocational education majors ranged from 2.71 for business education majors to 3.03 for health services majors.

c. Unclassified students earned the highest GPRs as in past semesters, probably because of the lighter credit loads they carry.

d. The data by educational objective show that the unclassified students earned the highest GPRs followed by those seeking Associate in Science degrees (2.96 and 2.77, respectively).

Summary

The GPRs earned by and the grades assigned to students show very little difference compared to those earned in Fall 1978. However, they are lower than those earned in earlier fall semesters. Of particular interest is that vocational education majors, for the first time, earned higher GPRs than the liberal arts majors this past fall semester.
